- Weight incl. Packaging: 0.61 kg
- Master carton quantity: 6

Power
- Battery voltage: 1.5 V
- Number of batteries: 3

Highlights

Adjustable timer
The radio's playing time can easily be controlled by setting the preferred number of minutes on the digital timer. It automatically counts down the time and turns off the radio at the end of the session.

Anti-slip and easy-grip design
The radio's special design fits the natural curve of human hands, and its matt texture on two sides ensures you can grab it with wet hands. The bottom of the radio is rubberized so you can press the buttons easily without worrying about it slipping.

Battery operation
The clock operates on two AA batteries for optimum portability and positioning.

Built-in clock function
Built-in clock function

Detachable strap
A detachable strap is provided to let you place your bathroom radio wherever you want. Remove the strap if you plan to place the radio on a flat surface, or wrap the strap around your shower head, faucet or towel bar to use in the bath.

Splashproof design
The sound quality of the radio's waterproof speaker will not degrade over time. Splashproof material and a solid mechanical design means you can place your radio in the wettest part of your bathroom such as on the wash basin or in the bathtub. You can even hang it over the shower nozzle. The radio can handle a brief jet of water on its surface.

Warns of low power level

The low battery indicator lights up when the power is low.
